SAMPLE CALCULATIONS OF THE PAYMENT AMOUNT

The examples set out below are included for illustration purposes only. The prices of the Shares included in the Equity Portfolio used to illustrate the calculation of Variable Return are not estimates or forecasts of the Base Prices and Settlement Prices of the Shares on which the calculation of the Percentage Change, and in turn Variable Return, will depend. All examples assume that a Noteholder has purchased Notes with an aggregate principal amount of \$10,000 and that no Extraordinary Event has occurred.

Example #1 – Hypothetical calculation of the Payment Amount where Percentage Change is strongly positive. It is assumed that the Base Prices and Settlement Prices for each Share are as illustrated below (hypothetical). The Payment Amount would be calculated as follows:
