SAMPLE CALCULATIONS OF INTEREST

The examples set out below are included for illustration purposes only. The prices of the Shares included in the Equity Portfolio used to illustrate the calculation of interest are not estimates or forecasts of the prices of the Shares on which the Original Valuation Price, the Annual Valuation Prices, and/or the calculation of the Share Return Percentages (defined below), and in turn Variable Interest, if any, will depend. All examples assume that no Extraordinary Event has occurred. Capitalized terms which are not otherwise defined herein are defined under “Definitions” in the Information Statement.

Example #1 — Hypothetical calculation of Variable Interest per Note in respect of an Annual Period, where the Variable Interest paid is positive. It is assumed that the Original Valuation Price and Annual Valuation Price for each Share are as illustrated below (hypothetical). The Share Return Percentages used to calculate interest payable in respect of the Annual Period would be calculated as follows:

Share Return Percentage: The Share Return Percentage for a Share in the Equity Portfolio in respect of a particular Annual Period will be determined as follows:

- (a) If the Percentage Change measured from the Share's official closing price on the Initial Valuation Date to its official closing price on the first Exchange Day immediately preceding the Anniversary Date marking the end of such Annual Period is greater than zero, the Share Return Percentage will be 6.00%; and
- (b) If the Percentage Change in the price of such Share is equal to or less than zero, the Share Return Percentage will be the actual Percentage Change (which, in such circumstances, will be zero or a negative percentage), provided that if the actual Percentage Change is equal to or less than -10.00%, the Percentage Change for such Share shall be deemed to be -10.00%.

All capitalized terms unless defined herein, will have the meanings ascribed to them in the Information Statement.

An investment in the Deposit Notes provides opportunities for investment but may pose risks. See further details under “Risk Factors” in the Information Statement. Specific risks include:

- The maximum amount of Variable Interest that a Noteholder could receive over the term of the Notes is \$42.00 per Note, or a variable amount between 0.50% and 6.00% of the Principal Amount in the first to the seventh Annual Periods.
- Noteholders do not have ownership in the Shares and therefore are not entitled to receive dividends or other distributions paid thereon. The dividend yield of the Equity Portfolio was 5.07% as of April 7, 2021 which would equate to 41.37% over the term of the notes assuming dividends remain constant and are not re-invested.
- Secondary Market Price – The price for the notes in any secondary market will be based on market conditions and could be above or below the \$100 Principal Amount, subject to an early trading fee of up to 3.00%. RBC reserves the right to not make a secondary market.
- Extraordinary Events – The payment of Variable Interest could be accelerated or delayed due to the occurrence of certain Extraordinary Events.
