INVESTMENT HIGHLIGHTS

Issuer: Royal Bank of Canada

Currency: CAD

Term: Approximately 7 years

Underlying Index: The Variable Return will be determined by reference to the price performance of the S&P/TSX 60 Index. Notes do not represent an interest in the Index or in the securities of the companies that comprise the Index. Holders have no right or entitlement to the dividends or other distributions paid on these securities. The indicative dividend yield of the Index as of June 10, 2022 was 3.15%, representing an aggregate dividend yield of approximately 24.25% compounded annually over the 7 year term, on the assumption that the dividend yield remains constant.

Variable Return: The Variable Return, if any, on each Note upon maturity will be an amount equal to the Principal Amount multiplied by the Percentage Change multiplied by the Participation Rate. The Variable Return, if any, will not be less than zero.

Participation Rate: 150%

Credit Ratings: 100% principal protection guaranteed by RBC at maturity. RBC is rated Aa1 by Moody's, AA- by Standard and Poors and AA by DBRS.

Secondary Market: The Notes are tradeable in a daily secondary market, subject to availability, which RBC Capital Markets will use reasonable efforts to provide as outlined in the Information Statement. Proceeds on sale may be less than the \$100 Principal Amount.

Eligibility for Investment: RRSPs, RDSPs, RESPs, TFSA's, RRIFs and DPSPs.

The deposit notes are not insured under the Canada Deposit Insurance Corporation Act. The Notes are not conventional notes or debt securities. For the various risks associated with such an investment, please see the Risk Factors section of the Information Statement.

SAMPLE CALCULATIONS OF THE PAYMENT AMOUNT

The examples set out below are included for illustration purposes only. The levels of the Index used to illustrate the calculation of Variable Return are not estimates or forecasts of the level of the Index on which the Base Level and Settlement Level or the calculation of the Percentage Change, and in turn Variable Return, will depend. All examples assume that a Noteholder has purchased Notes with an aggregate Principal Amount of \$10,000 and that no Extraordinary Event has occurred.

Example #1 – Hypothetical calculation of the Payment Amount where the Settlement Level of the Index is greater than the Base Level. It is assumed that the Base Level of the Index is 1,223.33 and the Settlement Level of the Index is 1,590.33 (hypothetical). The Payment Amount would be calculated as follows:

Base Level = 1,223.33

Settlement Level = 1,590.33

Percentage Change =

$$\frac{(1,590.33 - 1,223.33)}{1,223.33} = 0.30000 \text{ or } 30.000\%$$

Variable Return = \$10,000.00 × 30.000% × 150.00% = \$4,500.00

Payment Amount = \$10,000.00 + \$4,500.00 = \$14,500.00

In this example, the Payment Amount provides a return equivalent to an annually compounded rate of return of 5.45%.

Example #2 – Hypothetical calculation of the Payment Amount where the Settlement Level of the Index is less than the Base Level. It is assumed that the Base Level of the Index is 1,223.33 and the Settlement Level of the Index is 856.33 (hypothetical). The Payment Amount would be calculated as follows:

Base Level = 1,223.33

Settlement Level = 856.33

Percentage Change =

$$\frac{(856.331 - 1,223.33)}{1,223.33} = -0.30000 \text{ or } -30.000\%$$

Variable Return = \$10,000.00 × 0.000% × 150.00% = \$0.00

Payment Amount = \$10,000.00 + \$0.00 = \$10,000.00

In this example, the Payment Amount provides a return equivalent to an annually compounded rate of return of 0.00%.

An investment in the Notes provides opportunities for investment but may pose risks. See further details under "Risk Factors" in the Information Statement. Specific risks include:

- Interest Payable at Maturity – The Principal Amount plus Variable Return (if positive) is payable only at maturity.
- Noteholders do not have ownership in the Index or in the securities of the entities that comprise the Index and therefore are not entitled to receive dividends or other distributions paid on these securities. The indicative dividend yield of the Index was 3.15% as of June 10, 2022 which would equate to 24.25% over the term of the notes assuming dividends remain constant and are not re-invested
- Secondary Market Price – The price for the Notes in any secondary market will be based on market conditions and could be above or below the \$100 Principal Amount. RBC reserves the right not to make a secondary market.
- Extraordinary Events – The payment of Variable Return could be accelerated or delayed due to the occurrence of certain Extraordinary Events.
