## KEY TERMS

Issuer:	Royal Bank of Canada
Issuer Credit Ratings:	Moody's: Aa1; S&P: AA-; DBRS: AA
Currency:	USD
Minimum Investment:	50 Securities or US\$5,000
Term:	Approximately 7.0 years
Principal at Risk:	The Securities are not principal protected.
Underlying Index:	The return on the Securities is linked to the performance of the Solactive Equal Weight US Major Bank Select AR Index (the “ <b>Underlying Index</b> ”). The Underlying Index is an adjusted return index that aims to track the gross total return performance of the Solactive Equal Weight US Major Bank Select GTR Index (the “ <b>Target Index</b> ”), subject to reduction of a synthetic dividend of 37.5 index points per annum calculated daily in arrears (the “ <b>Adjusted Return Factor</b> ”). <b>For the avoidance of doubt, the return on the Securities is linked to the Underlying Index and is not linked to the Target Index.</b> The Closing Level on March 26, 2024 was 1,436.07. The Adjusted Return Factor divided by the Closing Level was therefore equal to 2.6113% on March 26, 2024. If an Autocall Redemption Event does not occur, over the term of the Securities the sum of the Adjusted Return Factor will be approximately 262.5 index points, representing 18.2791% of the Closing Level on March 26, 2024. For the calculation of the level of the Target Index, any dividends or other distributions paid on the constituent securities of the Target Index are assumed to be reinvested across all of the constituent securities of the Target Index. As of March 26, 2024, the annual dividend yield on the Target Index was 2.7743%, representing an aggregate dividend yield of approximately 21.1133% compounded annually over the term of the Securities, on the assumption that the dividend yield remains constant.
Issue Date:	April 15, 2024
Initial Index Level:	The Closing Level on the March 26, 2024 (the “ <b>Initial Valuation Date</b> ”), being 1,436.07.
Protection Barrier Level:	75.00% of the Initial Index Level, being 1,077.05.

A final base shelf prospectus containing important information relating to the securities described in this document has been filed with the securities regulatory authorities in each of the provinces and territories of Canada. A copy of the final base shelf prospectus and any applicable shelf prospectus supplement that has been filed, is required to be delivered with this document. This document does not provide full disclosure of all material facts relating to the securities offered. Investors should read the final base shelf prospectus, any amendment and any applicable shelf prospectus supplement for disclosure of those facts, especially risk factors relating to the securities offered, before making an investment decision.

## KEY TERMS CONTINUED

Coupon Barrier Level:	75.00% of the Initial Index Level, being 1,077.05.																
Final Index Level:	The Closing Level on March 26, 2031 (the “ <b>Final Valuation Date</b> ”).																
Closing Level:	The official closing level of the Underlying Index as announced by the Index Sponsor for the relevant date, as determined by the Calculation Agent.																
Maturity Date:	April 15, 2031																
Observation Dates:	The dates set out below under the heading “Observation Dates”, provided that if any Observation Date is not an Exchange Day, such Observation Date will be the next following day that is an Exchange Day, subject to the occurrence of an Extraordinary Event.																
Interest Payment Dates:	The dates set out below under the heading “Interest Payment Dates”, subject to the occurrence of an Extraordinary Event, and provided that (i) the Securities are not redeemed by the Bank as described below and (ii) if any Interest Payment Date is not a Business Day, such Interest Payment Date will be the first following day that is a Business Day. For greater certainty, the final Interest Payment, if any, will be made on the earlier of the Autocall Redemption Date (defined below), if any, and the Maturity Date.																
Interest Payments:	<p>Interest payments, if any, on the Securities will be payable in arrears on each Interest Payment Date at a fixed interest rate of 0.8625% for each monthly period ending on an Interest Payment Date (an “<b>Interest Period</b>”) in which a Digital Payout Event occurs.</p> <p>If a Digital Payout Event does not occur on an Observation Date, no interest will be payable for the relevant Interest Period.</p>																
Digital Payout Event:	If the Closing Level is greater than or equal to the Coupon Barrier Level on the relevant Observation Date, a Digital Payout Event will occur.																
Autocall Redemption Event:	<p>If the Closing Level on an Observation Date immediately preceding an Autocall Redemption Date is greater than or equal to 105.00% of the Initial Index Level (the “<b>Autocall Redemption Level</b>”), an Autocall Redemption Event will occur.</p> <p>Following the occurrence of an Autocall Redemption Event, the Securities will be redeemed for an amount equal to the Principal Amount thereof (the “<b>Autocall Redemption Amount</b>”) on the Autocall Redemption Date.</p>																
Autocall Redemption Date:	The dates set out below under the heading “Autocall Redemption Dates”, subject to the occurrence of an Extraordinary Event and provided that if any Autocall Redemption Date is not a Business Day, such Autocall Redemption Date will be the first following day that is a Business Day.																
Payment at Maturity:	<p>If the Securities have not been previously redeemed, the amount payable on the Maturity Date (the “<b>Final Redemption Amount</b>”) for each Security will be:</p> <p>(a) if the Final Index Level is greater than or equal to the Protection Barrier Level, US\$100; or</p> <p>(b) if the Final Index Level is less than the Protection Barrier Level, an amount equal to the Index Return, but in any event not less than US\$1.00.</p>																
Index Return:	$US\$100 \times (X_f / X_i),$ <p>where:</p> <p>“<b>X<sub>f</sub></b>” means the Final Index Level, and</p> <p>“<b>X<sub>i</sub></b>” means the Initial Index Level.</p>																
Secondary Market:	<p>Fundserv, RBC10952</p> <p>Generally, to be effective on a Business Day, a redemption request will need to be initiated by 2:00 p.m. (Toronto time) on that Business Day (or such other time as may be established by Fundserv). Any request received after such time will be deemed to be a request sent and received on the next following Business Day.</p>																
Early Trading Charge Schedule:	<table> <tr> <th>If Sold Within the Following No. of Days from the Issue Date</th><th>Early Trading Charge (% of Principal Amount)</th></tr> <tr> <td>1 - 20 days</td><td>3.50%</td></tr> <tr> <td>21 - 40 days</td><td>3.00%</td></tr> <tr> <td>41 - 60 days</td><td>2.50%</td></tr> <tr> <td>61 - 80 days</td><td>2.00%</td></tr> <tr> <td>81 - 100 days</td><td>1.50%</td></tr> <tr> <td>101 - 120 days</td><td>1.00%</td></tr> <tr> <td>Thereafter</td><td>Nil</td></tr> </table>	If Sold Within the Following No. of Days from the Issue Date	Early Trading Charge (% of Principal Amount)	1 - 20 days	3.50%	21 - 40 days	3.00%	41 - 60 days	2.50%	61 - 80 days	2.00%	81 - 100 days	1.50%	101 - 120 days	1.00%	Thereafter	Nil
If Sold Within the Following No. of Days from the Issue Date	Early Trading Charge (% of Principal Amount)																
1 - 20 days	3.50%																
21 - 40 days	3.00%																
41 - 60 days	2.50%																
61 - 80 days	2.00%																
81 - 100 days	1.50%																
101 - 120 days	1.00%																
Thereafter	Nil																

The following examples show how return on the Securities would be calculated under different scenarios. These examples are included for illustration purposes only. The performance of the Underlying Index used in the examples is not an estimate or forecast of the performance of the Underlying Index or the Securities. The actual performance of the Underlying Index and the Securities will be different from these examples and the differences may be material. All examples assume that a holder of the Securities has purchased Securities with an aggregate Principal Amount of US\$100 and that no Extraordinary Event has occurred. For convenience, each vertical line in the charts below represents both a hypothetical Observation Date and the next succeeding Interest Payment Date. Where applicable, dollar amounts are rounded to the nearest whole cent.

**Example #1 — Loss Scenario with Payment on the Maturity Date at Less Than the Principal Amount**

In this scenario, the Closing Level is below the Autocall Redemption Level on all Observation Dates so the Securities would not be redeemed before the Maturity Date. The Closing Level is at or above the Coupon Barrier Level on 41 of the 84 Observation Dates. On the Final Valuation Date, the Final Index Level is below the Protection Barrier Level.

*(i) Interest Payments*

Digital Payout Events occur on 41 of the 84 Observation Dates. Therefore, an Interest Payment would be payable for 41 Interest Periods on the applicable Interest Payment Date, for total Interest Payments of:

$$\begin{aligned} & \text{Principal Amount of Securities} \times 0.8625\% \text{ per Interest Period} \times 41 \text{ Interest Periods} \\ & \text{US\$100.00} \times 0.8625\% \times 41 = \text{US\$35.36} \end{aligned}$$

*(ii) Final Redemption Amount*

In this example, the Initial Index Level ( $X_i$ ) is 1,436.07 and the Final Index Level ( $X_f$ ) is 631.87. Therefore, the Final Redemption Amount is as follows:

$$\begin{aligned} & \text{US\$100.00} \times (X_f / X_i) \\ & \text{US\$100.00} \times (631.87 / 1,436.07) = \text{US\$44.00} \end{aligned}$$

Therefore, the total amounts payable per Security from the Issue Date to the Maturity Date are:

- (a) Total Interest Payments: US\$35.36
- (b) Final Redemption Amount: US\$44.00
- (c) Total amount paid over the term of the Securities: US\$79.36

The equivalent annually compounded rate of return in this example is -3.25%.

**Example #2: Gain Scenario with Interest Payments and the Securities are Not Called Prior to Maturity**

- Indicates Observation Dates on which the Coupon Barrier Level is breached; therefore no Interest Payment will occur on the related Interest Payment Date.
- Indicates Observation Dates on which there is a Digital Payout Event; therefore an Interest Payment will occur on the related Interest Payment Date.
- Solactive Equal Weight US Major Bank Select AR Index

All amounts in graph in US\$.

In this scenario, there is no Observation Date on which the Closing Level is at or above the Autocall Redemption Level and, accordingly, the Securities would not be redeemed before the Maturity Date. On the Final Valuation Date, the Final Index Level is at or above the Protection Barrier Level and below the Autocall Redemption Level.

**(i) Interest Payments**

In this example, there is a Digital Payout Event on 42 of the 84 Observation Dates. On the other 42 Observation Dates, no Digital Payout Event would occur because the Closing Level is below the Coupon Barrier Level. Therefore, the Interest Payment of US\$0.8625 per Interest Period would be payable for 42 Interest Periods on the applicable Interest Payment Date for total Interest Payments of:

$$\begin{aligned} & \text{Principal Amount of Securities} \times 0.8625\% \text{ per Interest Period} \times 42 \text{ Interest Periods} \\ & \text{US\$100} \times 0.8625\% \times 42 = \text{US\$36.23} \end{aligned}$$

**(ii) Final Redemption Amount**

In this example, the Final Index Level of 1,112.95, which is above its Protection Barrier Level of 1077.05, the Final Redemption Amount per Security is equal to US\$100.00.

Therefore, the total amounts payable per Security from the Issue Date to the Maturity Date are:

(a) Total Interest Payments: US\$36.23

(b) Final Redemption Amount: US\$100.00

(c) Total amount paid over the term of the Securities: US\$136.23

The equivalent annually compounded rate of return in this example is 4.52%.

### Example #3 — Gain Scenario with Autocall Redemption Event

All amounts in graph in US\$.

In this scenario, the Closing Level is at or above the Autocall Redemption Level on the Observation Date that falls 32 months into the term of the Securities. This would constitute an Autocall Redemption Event and, on the next succeeding Interest Payment Date, the Bank would redeem the Securities.

#### (i) Interest Payments

In this example, there is a Digital Payout Event on each of the 32 Observation Dates prior to the redemption of the Securities because the Closing Level is at or above the Coupon Barrier Level on each such date. Therefore, the Interest Payment of US\$0.8625 per Interest Period would be payable for each Interest Period on the applicable Interest Payment Date (including on the Autocall Redemption Date), for total Interest Payments of:

$$\begin{aligned} & \text{Principal Amount of Securities} \times 0.8625\% \text{ per Interest Period} \times 32 \text{ Interest Periods} \\ & \text{US\$100} \times 0.8625\% \times 32 = \text{US\$27.60} \end{aligned}$$

#### (ii) Autocall Redemption Amount

The Autocall Redemption Amount per Security is equal to US\$100.00.

Therefore, the total amounts payable per Security from the Issue Date to the Autocall Redemption Date are:

- (a) Total Interest Payments: US\$27.60
- (b) Autocall Redemption Amount: US\$100.00
- (c) Total amount paid over the term of the Securities: US\$127.60

The equivalent annually compounded rate of return in this example is 9.57%.

**Initial Estimated Value:**

The initial estimated value of the Securities on or about the date of the Pricing Supplement was US\$95.47 per Security, which is less than the price to the public and is not an indication of the actual profit to the Bank or its affiliates. The actual value of the Securities at any time will reflect many factors and may be less than this amount. The initial estimated value of the Securities is an estimate only and does not represent a minimum price at which the Bank, RBC DS or any of our affiliates would be willing to purchase the Securities in any secondary market. We describe our determination of the initial estimated value in more detail in the Pricing Supplement.

The Underlying Index is calculated and published by Solactive AG (“**Solactive**”), and the name “**Solactive**” is a registered trademark of Solactive. The Underlying Index has been licensed for use by the Bank in connection with the Securities. The Securities are not sponsored, promoted, sold or supported in any other manner by Solactive and Solactive makes no representation or warranty, express or implied, regarding the advisability of investing in securities generally or the Securities in particular. Solactive does not guarantee the accuracy or completeness of the Underlying Index or the Target Index, any data included therein, or any data from which it is derived, nor has any liability for any errors, omissions, or interruptions therein.

All capitalized terms unless otherwise defined have the meanings ascribed to them in the Pricing Supplement.

Clients should evaluate the financial, market, legal, regulatory, credit, tax and accounting risks and consequences of the proposal before entering into any transaction, or purchasing any instrument. Clients should evaluate such risks and consequences independently of Royal Bank of Canada and the Dealers, RBC Dominion Securities Inc. (“**RBC DS**”) and Raymond James Ltd., respectively. RBC DS is a wholly-owned subsidiary of the Bank. Consequently, the Bank is a related and connected issuer of RBC DS within the meaning of applicable securities legislation.

The Securities will not constitute deposits insured under the *Canada Deposit Insurance Corporation Act* or any other deposit insurance regime. The Securities are not fixed income securities and are not designed to be alternatives to fixed income or money market instruments.

An investment in the Securities involves risks. None of Royal Bank of Canada, the Dealers or any of their respective affiliates, associates, or any other person or entity guarantees that holders of Securities will receive an amount equal to their original investment in the Securities or guarantees that any return will be paid on the Securities (subject to the minimum amount payable at maturity of US\$1.00 per Security) at or prior to maturity of the Securities. See “Risk Factors” in the base shelf prospectus and “Risk Factors” in the Pricing Supplement. Since the Securities are not principal protected and the Principal Amount will be at risk, you could lose substantially all of your investment.
