# RBC Principal Protected Solactive Canada Blue Chip II AR Index Linked Autocallable LEOS<sup>®</sup> (CAD), Series 98

7 year term	<b>100%</b> Principal Protection at Maturity	Autocallable annually at <b>Year 1</b>
	Interest Payment if Note is Autocalled	d

Year 1: 5.75% | Year 2: 11.50% | Year 3: 17.25% | Year 4: 23.00% | Year 5: 28.75% | Year 6: 34.50% | Year 7: 40.25%

This Note is a 7 year investment designed to provide exposure to the adjusted returns of the Solactive Canada Blue Chip II AR Index. Investors will receive the Interest Payment in addition to the Autocall Redemption Amount should an Autocall Redemption Event occur and will receive their full principal amount at maturity should an Autocall Redemption Event not previously occur. The principal amount is guaranteed by RBC on the maturity date of November 10, 2031.

## **INVESTMENT HIGHLIGHTS - CONTINUED**

	(b) if an Autocall Redemption Event occurs on the second Observation Date, the Interest Payment payable per Note will be equal to the sum of (i) \$11.50 and (ii) if the Percentage Change exceeds 11.50%, 15.00% × (\$100.00 × Percentage Change - \$11.50);
	(c) if an Autocall Redemption Event occurs on the third Observation Date, the Interest Payment payable per Note will be equal to the sum of (i) \$17.25 and (ii) if the Percentage Change exceeds 17.25%, 15.00% × (\$100.00 × Percentage Change - \$17.25);
	(d) if an Autocall Redemption Event occurs on the fourth Observation Date, the Interest Payment payable per Note will be equal to the sum of (i) \$23.00 and (ii) if the Percentage Change exceeds 23.00%, 15.00% × (\$100.00 × Percentage Change - \$23.00);
	(e) if an Autocall Redemption Event occurs on the fifth Observation Date, the Interest Payment payable per Note will be equal to the sum of (i) \$28.75 and (ii) if the Percentage Change exceeds 28.75%, 15.00% × (\$100.00 × Percentage Change - \$28.75);
	(f) if an Autocall Redemption Event occurs on the sixth Observation Date, the Interest Payment payable per Note will be equal to the sum of (i) \$34.50 and (ii) if the Percentage Change exceeds 34.50%, 15.00% × (\$100.00 × Percentage Change - \$34.50); or
	(g) if an Autocall Redemption Event occurs on the Final Valuation Date, the Interest Payment payable per Note on the Maturity Date will be equal to the sum of (i) \$40.25 and (ii) if the Percentage Change exceeds 40.25%, 15.00% × (\$100.00 × Percentage Change - \$40.25).
	If an Autocall Redemption Event does not occur on an Observation Date, no Interest Payment will be payable on the Notes on the next succeeding Autocall Redemption Date.
Credit Rating:	100% principal protection guaranteed by RBC at maturity. RBC is rated Aa1 by Moody's, AA- by Standard and Poor's and AA by DBRS.
Secondary Market:	The Notes are tradeable in a daily secondary market, subject to availability, which RBC Capital Markets will use reasonable efforts to provide as outlined in the Information Statement. An early trading charge may apply (initially 3.00%, reducing to 0% after 270 days). Proceeds on sale may be less than the \$100 Principal Amount.
Eligibility for Investment:	RRSPs, RRIFs, TFSAs, FHSAs, RDSPs, RESPs and DPSPs.

# SAMPLE CALCULATIONS OF THE AMOUNTS PAYABLE OVER THE TERM OF THE NOTES

The examples set out below are included for illustration purposes only. The levels of the Underlying Index used to illustrate the calculation of the amounts payable, including the Final Redemption Amount or Autocall Redemption Amount and the Interest Payment, over the term of the Notes are not estimates or forecasts of the level of the Underlying Index on which the Base Level and Settlement Level or the calculation of the Percentage Change, and in turn the Final Redemption Amount, Autocall Redemption Amount and Interest Payment, if any, will depend. All examples assume an aggregate principal amount of \$10,000.00, that a Noteholder holds the Notes until the Notes are automatically called or until maturity if the Notes are not automatically called and that no Extraordinary Event has occurred.

Example #1 — Hypothetical calculation of the amounts payable where the Percentage Change is below 5.00% on each Observation Date. It is assumed that the Base Level of the Underlying Index is 1,612.67 and the Settlement Level of the Underlying Index on the Final Valuation Date is 1,128.87 (hypothetical). The amounts payable would be calculated as follows:

Base Level = 1,612.67

Settlement Level on the Final Valuation Date = 1,128.87

Percentage Change on the Final Valuation Date = (1,128.87 - 1,612.67) / 1,612.67 = -0.30000 or -30.000%

In this scenario, it is assumed that there is no Observation Date on which the Percentage Change is greater than or equal to 5.00% and, accordingly, the Notes would not be redeemed.

#### i) Interest Payment

In this example, no Autocall Redemption Event would occur because the Percentage Change on each Observation Date, including the Final Valuation Date, is below 5.00%.

Therefore, an Interest Payment would not be payable on any Interest Payment Date.

## **RBC STRUCTURED NOTES GROUP**

#### ii) Final Redemption Amount

The Final Redemption Amount per Note is equal to \$100.00.

Therefore, the total amounts payable from the Issue Date to the Maturity Date are:

(a) Interest Payment: \$0.00

(b) Final Redemption Amount: \$10,000.00

(c) Total amount paid over the term of the Notes: \$10,000.00

The equivalent annually compounded rate of return in this example is 0.00%.

Example #2 — Hypothetical calculation of the amounts payable where the Percentage Change is greater than or equal to 5.00% on the first Observation **Date.** It is assumed that the Base Level of the Underlying Index is 1,612.67 and the Settlement Level of the Underlying Index on the first Observation Date is 2,096.47 (hypothetical). The amounts payable would be calculated as follows:

Base Level = 1,612.67

Settlement Level on the first Observation Date = 2,096.47

Percentage Change on the first Observation Date = (2,096.47 - 1,612.67) / 1,612.67 = 0.30000 or 30.000%

In this scenario, it is assumed that the Percentage Change is greater than or equal to 5.00% on the first Observation Date, which falls 12 months into the term of the Notes. This would constitute an Autocall Redemption Event and an Interest Payment would be payable on the next succeeding Interest Payment Date.

### i) Interest Payment

In this example, there is an Autocall Redemption Event on the first Observation Date. Therefore, the Interest Payment payable per Note on the Autocall Redemption Date would be equal to the sum of (i) \$5.75 and (ii) 15.00% × (\$100.00 × Percentage Change - \$5.75).

Percentage Change on the first Observation Date = 30.000%

Since the Percentage Change is greater than 5.75%, the Interest Payment per Note is calculated as follows:

Interest Payment per Note = \$5.75 + [15.00% × (\$100.00 × 30.000% - \$5.75)] = \$9.39

#### ii) Autocall Redemption Amount

The Autocall Redemption Amount per Note is equal to \$100.00.

Therefore, the total amounts payable from the Issue Date to the Autocall Redemption Date are:

- a) Interest Payment: \$938.75
- b) Autocall Redemption Amount: \$10,000.00
- c) Total amount paid over the term of the Notes: \$10,938.75

The equivalent annually compounded rate of return in this example is 9.39%.

Example #3 — Hypothetical calculation of the amounts payable where the Percentage Change is below 5.00% on the first through sixth Observation Dates but is greater than or equal to 5.00% on the Final Valuation Date. It is assumed that the Base Level of the Underlying Index is 1,612.67 and the Settlement Level of the Underlying Index on the Final Valuation Date is 1,773.94 (hypothetical). The amounts payable would be calculated as follows:

Base Level = 1,612.67

Settlement Level on the Final Valuation Date = 1,773.94

Percentage Change on the Final Valuation Date = (1,773.94 - 1,612.67) / 1,612.67 = 0.10000 or 10.000%

In this scenario, it is assumed that the Percentage Change is below 5.00% on the first through sixth Observation Dates but is greater than or equal to 5.00% on the Final Valuation Date (being the final Observation Date). This would constitute an Autocall Redemption Event and an Interest Payment would be payable on the Maturity Date (being the final Interest Payment Date).

#### i) Interest Payment

In this example, there is an Autocall Redemption Event on the Final Valuation Date. On the first, second, third, fourth, fifth, and sixth Observation Dates, no Autocall Redemption Event would occur because it is assumed that the Percentage Change at each such Observation Date is below 5.00%. Therefore, the Interest Payment payable per Note on the Maturity Date would be calculated as follows:

Percentage Change on the Final Valuation Date = 10.000%

Since the Percentage Change is less than 40.25%, the Interest Payment per Note is \$40.25.

#### ii) Autocall Redemption Amount

The Autocall Redemption Amount per Note is equal to \$100.00.

Therefore, the total amounts payable from the Issue Date to the Autocall Redemption Date are:

- (a) Interest Payment: \$4,025.00
- (b) Autocall Redemption Amount: \$10,000.00
- (c) Total amount paid over the term of the Notes: \$14,025.00

The equivalent annually compounded rate of return in this example is 4.95%.

- An investment in the Notes provides opportunities for investment but may pose risks. See further details under "Risk Factors" in the Information Statement. Specific risks include:
- Payments on the Notes The Interest Payment will only be payable on the Notes if an Autocall Redemption Event occurs on an Observation Date. Noteholders will receive their full principal amount at maturity should an Autocall Redemption Event not previously occur.
- Noteholders do not have ownership in the Underlying Index, the Target Index or in the securities of the entities that comprise the Target Index and therefore are not entitled to receive dividends or other distributions paid on these securities.
- Secondary Market Price The price for the Notes in any secondary market will be based on market conditions and could be above or below the \$100 Principal Amount, subject to an early trading fee of up to 3.00%. RBC reserves the right not to make a secondary market.
- Extraordinary Events The payment of Alternative Variable Return (iif any) could be accelerated or delayed due to the occurrence of certain Extraordinary Events.
